The following is a complete listing of the claims in this application, reflects all changes currently being made to the claims, and replaces all earlier versions and all earlier listings of the claims.

Claim 1 (currently amended): A method of automatically selecting a font from a collection of fonts for use in one or more captions associated with one or more images, ~~wherein the~~ said method ~~comprises~~ comprising the steps of:

receiving the one or more images, wherein the one or more images have associated information;

automatically selecting one or more fonts from [[said]] the collection of fonts, based on the associated information ~~provided~~ received with the one or more images; and

setting the font of the one or more captions to one of the selected one or more fonts.

Claim 2 (currently amended): A method ~~as claimed in~~ according to claim 1, wherein the one or more images comprise one image.

Claim 3 (currently amended): A method ~~as claimed in~~ according to claim 2, wherein the associated information comprises one or more of the following: Time of day; Location information; User provided keywords; and Color information.

Claim 4 (currently amended): A method of automatically selecting a font from a collection of fonts for use in one or more captions associated with one or more images, ~~wherein the~~ said method ~~comprises~~ comprising the steps of:

receiving the one or more images, wherein the one or more images have associated meta-data;

analyzing the meta-data ~~associated~~ received with the one or more images to determine a key feature amongst the meta-data;

searching a library of fonts, each [[said]] font having a set of one or more associated key features;

automatically selecting one or more fonts from the font library having an associated [[said]] key feature best matching the [[said]] determined key feature; and

setting a font of the one or more captions to one of the selected one or more fonts.

Claim 5 (currently amended): A method ~~as claimed in~~ according to claim 4, wherein [[said]] the key feature comprises one of the following: (a) Same date and time within a particular range; (b) Same date and location; (c) same Keyword matching; (d) Same date and keyword; and (e) same Color similarities.

Claim 6 (currently amended): A method ~~as claimed in~~ according to claim 4, wherein [[the]] said method further comprises the step of[[:]] inserting and displaying the one or

more captions associated with the one or more images in a predefined default font, prior to said analyzing step.

Claim 7 (previously presented): A method ~~as claimed in~~ according to claim 6, wherein [[the]] said setting step ~~comprises the substeps of~~ includes:

replacing the predefined default font with one of the selected one or more fonts; and

displaying the one or more captions associated with the one or more images in the replaced font.

Claim 8 (currently amended): A method ~~as claimed in~~ according to claim 4, ~~wherein the method further comprises~~ comprising the step of[[:]] inserting and displaying the one or more captions associated with the one or more images in one of the selected one or more fonts.

Claim 9 (currently amended) A method ~~as claimed in~~ according to claim 6, wherein if the meta-data associated with the one or more images is not found in said selecting step, the one or more captions remain in the predefined default font.

Claim 10 (currently amended): A method ~~as claimed in~~ according to claim 6, wherein if a best matching key feature is not found in said searching step, the one or more captions remain in the predefined default font.

Claim 11 (currently amended): A method ~~as claimed in~~ <u>according to</u> claim 4, wherein the one or more images comprise a plurality of images and said analyzing step ~~comprises~~ <u>includes</u> analyzing meta-data associated with the plurality of images to find a most common key feature amongst the meta-data, and said ~~selecting~~ <u>automatic selection</u> step ~~comprises~~ <u>includes</u> selecting one of fonts of the font library having an associated [[said]] key feature best matching the common key feature.

Claim 12 (currently amended): A method ~~as claimed in~~ <u>according to</u> claim 4, wherein said automatic selection step includes selecting one [[said]] font [[of]] <u>from</u> the font library having an associated [[said]] key feature best matching the [[said]] determined key feature and said setting step automatically sets a font of the one or more captions to [[said]] <u>the</u> selected font.

Claim 13 (currently amended): A method ~~as claimed in~~ <u>according to</u> claim 4, wherein said setting step ~~comprises the substeps of~~ <u>includes</u>:

manually selecting one of [[said]] <u>the</u> automatically selected fonts by a user; and

setting the font of the one or more captions to [[said]] <u>the</u> manually selected font.

Claim 14 (withdrawn): A method of automatically selecting a theme from a collection of themes for use in one or more objects associated with one or more pages, wherein

the method comprises the steps of:

automatically selecting one or more themes from said collections of themes, based on information provided with the said one or more pages; and

setting the theme of the one or more objects with one of the selected one or more themes.

Claim 15 (withdrawn): A method as claimed in claim 14, wherein said one or more objects comprise one or more of: image frames on said one or more pages; background of said one or more pages; clip art on said one or more pages.

Claim 16 (withdrawn): The method as claimed in claim 14, wherein said information comprise meta-data associated with one or more images on said page and dates associated with said one or more images.

Claim 17 (withdrawn): A method as claimed in claim 14, wherein said automatic selection step selects one said theme from the collection of themes and said setting step automatically sets the theme of the one or more objects to said automatically selected theme.

Claim 18 (withdrawn): A method as claimed in claim 14, wherein said setting step comprises the substeps of:

manually selecting one of said automatically selected themes by a user; and

setting the theme of the one or more objects to said manually selected font.

Claim 19 (currently amended): A method of automatically selecting a font from a collection of fonts for use in one or more texts, ~~wherein the~~ said method ~~comprises~~ comprising the steps of:

receiving the one or more texts, wherein the one or more texts have associated information;

automatically selecting one or more fonts from [[said]] the collection of fonts, based on the associated information ~~associated~~ received with [[said]] the one or more texts; and

setting the font of the one or more texts to one of the selected one or more fonts.

Claim 20 (currently amended): A method ~~as claimed in~~ according to claim 19, wherein the one or more texts have predefined font attributes and said setting step ~~comprises the substep of~~ includes replacing the predefined font attributes with the set font.

Claim 21 (currently amended): A method ~~as claimed in~~ according to claim 19, wherein said automatic selection step includes selecting one [[said]] font from the collection of fonts and said setting step includes automatically setting the font of the one or more texts to [[said]] the automatically selected font.

Claim 22 (currently amended): A method ~~as claimed in~~ according to claim 19, wherein said setting step ~~comprises the substeps of~~ includes:

manually selecting one of [[said]] the automatically selected fonts by a user;

and

setting the font of the one or more texts to [[said]] the manually selected font.

Claim 23 (currently amended): A method of automatically selecting a font from a collection of fonts for use in one or more hyperlink texts, wherein the one or more texts are in an initial font, said ~~and the~~ method ~~comprises~~ comprising the steps of:

locating the one or more hyperlink texts, wherein the one or more hyperlink texts have associated information;

automatically selecting one [[said]] font from [[said]] the collection of fonts, based on the associated information ~~associated with said~~ of the one or more hyperlink texts; and

replacing the initial font of the one or more hyperlink texts with the selected font.

Claim 24 (currently amended): A method ~~as claimed in~~ according to claim 23, wherein [[said]] the associated information comprises the type and content of the hyperlink texts.

Claim 25 (currently amended): An ~~Apparatus~~ apparatus for automatically selecting a font from a collection of fonts for use in one or more captions associated with one or more images, ~~wherein the~~ said apparatus ~~comprises~~ comprising:

means for receiving the one or more images, wherein the one or more images have associated information;

means for automatically selecting one or more fonts from [[said]] the collection

- 8 -

of fonts, based on the associated information ~~provided~~ received with the one or more images; and

means for setting the font of the one or more captions to one of the selected one or more fonts.

Claim 26 (currently amended): An ~~Apparatus~~ apparatus for automatically selecting a font from a collection of fonts for use in one or more captions associated with one or more images, ~~wherein the~~ said apparatus ~~comprises~~ comprising:

means for receiving the one or more images, wherein the one or more images have associated meta-data;

means for analyzing the meta-data ~~associated~~ received with the one or more images to determine a key feature amongst the meta-data;

means for searching a library of fonts, each [[said]] font having a set of one or more associated key features;

means for automatically selecting one or more fonts from the font library having an associated [[said]] key feature best matching the [[said]] determined key feature; and

means for setting a font of the one or more captions to one of the selected one or more fonts.

Claim 27 (withdrawn): Apparatus for automatically selecting a theme from a collection of themes for use in one or more objects associated with one or more pages, wherein the apparatus comprises:

means for automatically selecting one or more themes from said collections of

themes, based on information provided with the said one or more pages; and

means for setting the theme of the one or more objects with one of the selected

one or more themes.

Claim 28 (currently amended): An ~~Apparatus~~ apparatus for automatically

selecting a font from a collection of fonts for use in one or more texts, ~~wherein the~~ said apparatus

~~comprises~~ comprising:

means for receiving the one or more texts, wherein the one or more texts have

associated information;

means for automatically selecting one or more fonts from [[said]] the collection

of fonts, based on the associated information ~~associated~~ received with [[said]] the one or more

texts; and

means for setting the font of the one or more texts to one of the selected one or

more fonts.

Claim 29 (currently amended): An ~~Apparatus~~ apparatus for automatically

selecting a font from a collection of fonts for use in one or more hyperlink texts, wherein the one

or more texts are in an initial font, said ~~and the~~ apparatus ~~comprises~~ comprising:

means for locating the one or more hyperlink texts, wherein the one or more

hyperlink texts have associated information;

means for automatically selecting one [[said]] font from [[said]] the collection

of fonts, based on the associated information ~~associated with said~~ of the one or more hyperlink

texts; and

means for replacing the font of the one or more hyperlink texts with the selected font.

Claim 30 (currently amended): A computer program product comprising a computer program for automatically selecting a font from a collection of fonts for use in one or more captions associated with one or more images, ~~wherein the~~ said computer program ~~comprises~~ comprising:

code for receiving the one or more images, wherein the one or more images have associated information;

[[means]] code for automatically selecting one or more fonts from [[said]] the collection of fonts, based on the associated information ~~provided~~ received with the one or more images; and

means for setting the font of the one or more captions to one of the selected one or more fonts.

Claim 31 (currently amended): A computer program product comprising a computer program for automatically selecting a font from a collection of fonts for use in one or more captions associated with one or more images, ~~wherein the~~ said computer program ~~comprises~~ comprising:

means for receiving the one or more images, wherein the one or more images have associated meta-data;

means for analyzing the meta-data ~~associated~~ received with the one or more

images to determine a key feature amongst the meta-data;

means for searching a library of fonts, each [[said]] font having a set of one or

more associated key features;

means for automatically selecting one or more fonts from the font library

having an associated [[said]] key feature best matching the [[said]] determined key feature; and

means for setting a font of the one or more captions to one of the selected one

or more fonts.

Claim 32 (withdrawn): A computer program product comprising a computer

program for automatically selecting a theme from a collection of themes for use in one or more

objects associated with one or more pages, wherein the computer program comprises:

means for automatically selecting one or more themes from said collections of

themes, based on information provided with the said one or more pages; and

means for setting the theme of the one or more objects with one of the selected

one or more themes.

Claim 33 (currently amended): A computer program product comprising a

computer program for automatically selecting a font from a collection of fonts for use in one or

more texts, ~~wherein the~~ said computer program ~~comprises~~ comprising:

means for receiving the one or more texts, wherein the one or more texts have

associated information;

means for automatically selecting one or more fonts from [[said]] the collection of fonts, based on the associated information ~~associated~~ received with [[said]] the one or more texts; and

means for setting the font of the one or more texts to one of the selected one or more fonts.

Claim 34 (currently amended:) A computer program product comprising a computer program for automatically selecting a font from a collection of fonts for use in one or more hyperlink texts, wherein the one or more texts are in an initial font, said ~~and the~~ computer program ~~comprises~~ comprising:

means for locating the one or more hyperlink texts, wherein the one or more hyperlink texts have associated information;

means for automatically selecting one [[said]] font from [[said]] the collection of fonts, based on the associated information ~~associated with said~~ of the one or more hyperlink texts; and

means for replacing the font of the one or more hyperlink texts with the selected font.
